

TOM CIPRIANO'S RESUME PAGE

Tom Cipriano has been working in the IT, HR, and Web arena for over 10 years now. In his most recent position as a SRC Coordinator for Wyeth Biotech Tom was responsible for numerous documents that were submitted to the FDA for drug approval. The project that he was brought on to work for was Prevnar 13v. Which is one of Wyeth's most profitable vaccines that will be replacing the 7v (valent) vaccine. In his position there he edited documents using the WSST Toolbar in Microsoft Word then uploaded the documents to erooms and EDMS. He then edited and tweaked the document in EDMS and magically converted it to PDF which is a secure web medium that restricts tampering. These documents were several hundreds even thousands of pages long and contained proprietary, Confidential and Restricted information on the process and manufacturing techniques of Prevnar 13v. During this project Tom made several trips to other Wyeth sites in Pearl River, NY and Andover, Mass.

Before signing on with 13v Tom worked with Shire Pharmaceuticals in Wayne, PA he was brought on as a SAP SRM Consultant to help clean up there numerous delayed PR/PO (Purchase Requisitions/Purchase Orders). While at Shire Tom helped get processed over 1 million dollars worth of old PO/PR that were either entered incorrectly or sitting in the SAP system. Tom was able to see the big picture and work with all the different department heads such as Procurement, and Accounts Payable to get the workflow flowing again. Tom conducting many manual reports that were able to drill down to see where the money flow was going and to see what step in the PO process the PR was in. Tom helped communicate the SAP process and status to numerous vendors in HR and to the different department heads throughout the Shire Organization.

Prior to Shire Tom was working with Wyeth again as a Contractor this time in Project Management handling all the Wyeth Partner Surveys in Inquisite for a large Partner year end meeting. Off again this time Tom went with Knoll office furniture in East Greenville, PA working for a Consulting company called VSS inc based out of

Mississippi as a Lotus Domino Consultant. In this position he was responsible for Network outages in the Plant and all new Blackberry activations on the BES (Blackberry Enterprise Server). He was very busy in his assignment conducting remote connections to the numerous Knoll Sales offices throughout the United States. He remoted using applications such as Dameware, and Net Meeting. Prior to Knoll he was back at Wyeth this time in Great Valley, PA working in the HR SAP Data Services as a contractor. In this position Tom was responsible for entering all the Wyeth related data into numerous infotypes in SAP. These systems feed off of other middleware that was installed at Wyeth such as Vurv and numerous others.

Tom was now working with the largest employer in Chester County Pennsylvania you guessed it Vanguard located in Malvern, PA and just down the road from the Wyeth Great Valley facility. Here Tom was brought on to work on one of Vanguards premier projects. This project was called Etrust. Etrust was a project to convert away from a older Legacy Identity Management system that Vanguard had in place on the mainframe called SAM which was owned by Beta Systems a company located in Germany. Etrust was a windows based system owned by CA Computer Associates. Tom worked for BAM as a consultant BAM stands for Business Access Management. Tom was responsible for creating and modifying access rights in etrust and he did numerous requests with VISA, Cognos, Oracle, Windows, Pershing, NetExPro and numerous other applications. He also helped convert ID's and profiles and worked with his team to demonstrate functions and capabilities throughout BAM.

Tom is currently open to all good opportunities at this time.

Best Regards,

Tom Cipriano
